SIDE PROJECTS

Feb 2021 - Aug 2021

Small Full stack service

I am building a full stack service aiming to help people in Stockholm to find 1st hand lease contracts for apartments. This project is built with the MERN stack (MongoDB, Express.js, React, Node.js) where I am also implementing Stripe subscriptions to make the service available for the consumers.

Apr 2019 - Sep 2019

Full stack scheduling tool

I spent around 5-6 months building the beginning of a full stack web application that was going to be a scheduling tool for a cleaning company. I built the project with React.js as the frontend and Express.js and MySQL as the backend. The project was never completed because of time constraints.

Dec 2018 - Mar 2019

Financial analysis tool

I spent 3-4 months building a tool to analyze cryptocurrency financial data from exchanges to help with buy/sell signals. This was built with Python using a library called CCXT, Matplotlib, Pandas and a few other parts. I used SQLite as a store of data for analysis.
